A simple new application created in android studio using newsapi.org (for country news), alphavantage.co (for currency conversion), openweathermap.org(for weather report).

Features:-

1.News sort by country

2.Good UI

3.News In brief

4.Weather report by location

5.Dynamic currency exchange rates

6.Used Retrofit Network

7. Suppport Hinidi Language

8. Database in shared preference and FIrebase

Hello :wave:
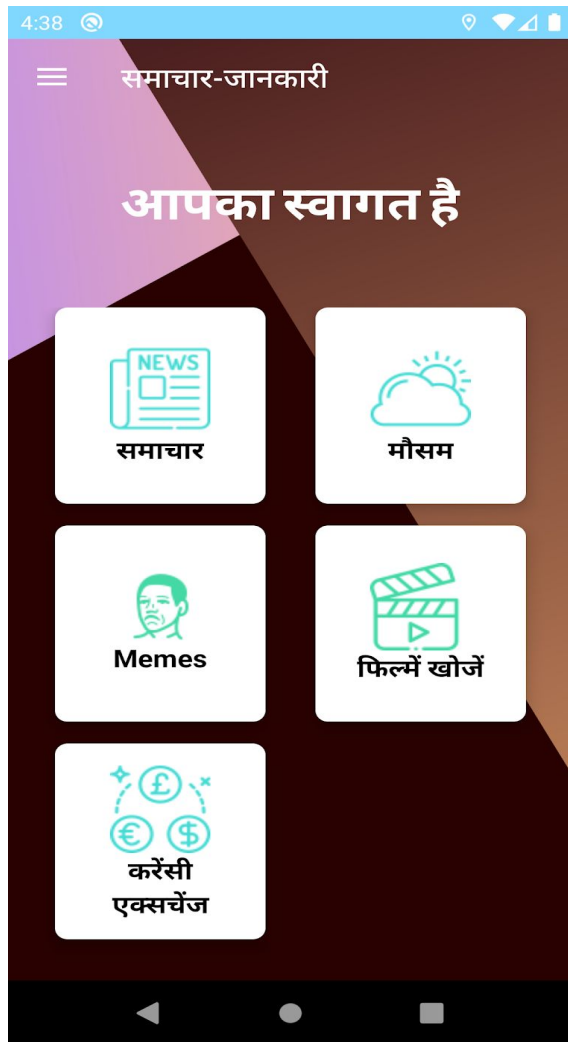

Welcome to All in One Project. It is a general app.

It uses many APIs to display information. It shows country specific new, weather of current location, movies rating, currency exchange rate, and memes

Technology used

- Java

- XML

- Android Studio

- Retrofit
